

**ZyXEL G-202 WPS
Release 3.0.0.c
Release Notes**

Date: March 30, 2010

Supported Platforms:

Windows 2000, Windows XP, Windows XP 64-bit,

Windows Vista32, Windows Vista64

Windows 7 32bit, Windows 7 64bit

Driver version:

09/22/2008,1.7.3.38 (XP 64bit/ XP 32bit/ 2000)

07/29/2008,2.2.0.27 (Vista32/ Vista64/Win7-32bit/Win7-64 bit)

Limitation

1. (SoftAP Mode) SoftAP didn't support power save mode. **SPRID** 060328356
2. Connect the AP with the encryption of 802.1X, that can't configure in "Site Survey" page.
3. (SoftAP Mode) Open System/Shared Key of WEP is the same with Auto.
4. (InstallShield) G-220 v2 and G-202 install the same PC. When uninstall G-220 v2 or G-202, another device couldn't work fine. **SPRID** 060328362

Known issue:

1. In normal user account. The AP mode didn't work normally. DUT can't connect to the AP with WPA/WPA2/WPA-PSK/WPA2-PSK/802.1x encryption. **SPRID** 060328353
2. Under Vista, active profile via utility will delete the WZC profiles. **SPRID** 071129963
3. In Vista OS. When utility enable. The Windows Zero Configuration didn't disable. **SPRID** 071003165
4. In Vista OS. The utility didn't support 256 WEP, WMM, Transfer Rate, Preamble Type, Power Saving Mode and AP mode function. **SPRID** 071003187
5. In XP64/XP/2000, AP mode doesn't support 256 WEP.
6. G-202 couldn't connect to NWA-3163 with hide SSID. **SPRID** 080220632
